

- 1 Binding
- 2 Internalization
- 3 N-VP2 cleavage
- 4 N-VP1 externalization and endosomal escape
- 5 Nuclear import of the virion
- 6 Replication and transcription of the viral genome
- 7 Expression of viral proteins
- 8 Pre-assembly of trimeric precursors
- 9 Nuclear translocation of trimers and capsid assembly
- 10 DNA packaging
- 11 Nuclear export
- 12 Egress
