

- 1** Binding
- 2** Internalization
- 3** N-VP2 cleavage
- 4** N-VP1 externalization and endosomal escape
- 5** Nuclear import of the virion
- 6** Replication and transcription of the viral genome
- 7** Expression of viral proteins
- 8** Pre-assembly of trimeric precursors
- 9** Nuclear translocation of trimers and capsid assembly
- 10** DNA packaging
- 11** Nuclear export
- 12** Egress
